Villa Ousia
Pitsidia, Greece

FIRM: [paly architects](#)
TYPE: Residential - Private House
STATUS: Built

YEAR 2025
SIZE 0 sqft - 1000 sqft
BUDGET \$500K - 1M

A residence situated on a hillside above a settlement, integrated into the landscape and in dialogue with nature. Three distinct parallelepiped volumes, slightly offset from one another, are connected by two transparent glass passages. The central, tallest volume is made of stone, while the two adjacent, equally tall volumes are coated with an "earth"-colored plaster. The first volume contains a bedroom with an en-suite bathroom, an office, and a shared WC. The central volume includes the entrance and the shared living areas—kitchen, dining room, and living room—in a single open-plan volume. The third volume houses the structured bedrooms.
